AESTHETICS NO NEEDLE FILLERS, SKIN BOOSTER FACIALS & FAT DISSOLVE TREATMENTS

No needle treatments are administered using a pressurised pen which is able to penetrate right down to the dermis spraying an even layer of filler beneath the skin surface.

Although not completely painless, it is far less painful than injection treatments and in most instances, the recovery time is far quicker.

NO NEEDLE LIP/FACIAL FILLER

No needle lip filler are becoming more and more popular as an alternative to Needle fillers. If you're looking for plump, fuller lips the airflow lip filler treatment using the Hyaluronic pen treatment could be perfect for you. The no needle lip filler treatment is affordable and less painful than injectable needle fillers using dermal filler.
